

Utyabswap

Litepaper

July 2024

## Introduction

Hello from UTYABLABS, we make apps for the people on TON. Today we're going to share details about our live products and everything we're building next. Plus there's info about our company, and everything you need to know about our flagship product UTYABSWAP, the DEX on TON that offers you speed, utility, and security. Join us as we bring TON Blockchain to the world!

## Swap

The easy way to swap coins on TON Blockchain, UTYABSWAP brings you the best rates by aggregating liquidity pools on TON. Plus we provide you with one of the lowest swap fees in the space, just 0.25% per transaction, with 0.20% for liquidity providers and 0.05% for our eco, which supports our referral rewards and \$UTYAB burn mechanism. So the more you use UTYABSWAP, the more you drive the price of \$UTYAB.

## Bridge

Bridge coins from other blockchains to \$TON, quickly and safely. Ethereum, Solana, and all the main chains are supported, Bitcoin too. Allowing you to choose between a fixed or floating rate, our bridge helps you to move your liquidity in just a moment. Use the search to select between hundreds of coins, enter your receiver address, and the rest is easy. We're especially proud to support TON ecosystem with this feature.

## Staking

\$UTYAB staking offers various pools, with time staked determining the reward offered. Notably, staking rewards are bought by UTYABSWAP from the market, placing buy pressure on \$UTYAB and supporting our tokenomics. Also we provide staking to other projects, generating revenue for our ecosystem and pushing \$UTYAB price. If you'd like to know more, see the section below: *The services we provide to other projects.*

## Fiat

A simple fiat to crypto swap is essential. So to make it easy, UTYABSWAP integrates a fiat on-ramp. There you can purchase crypto by credit card, mobile wallet, or bank transfer. You'll find support for USD, EUR, GBP, and other currencies, avoiding fiat to fiat conversions and saving you fees. Better yet, we're partnered with MoonPay, so their excellent security keeps your purchases safe.

## Telegram Mini App

Fast and effective, trade crypto on TON with our Telegram mini app. With all the same features as the full app, enjoy the UTYABSWAP user experience accompanied by our live support. Likewise for your benefit, we've leveraged Telegram's excellent security, so you can trade with confidence. After that, we welcome your feedback about the other features you would like to see. Try our mini app today @UtyabSwapBot

## The services we provide to other projects

We provide our services to other projects on TON. For example, our staking feature. This means if you own a project, you can use our platform to provide staking to your community. It's easy to get started, we assist you through quick and simple steps to list your pools on our DEX. Or if you prefer, you can use our API to display staking on your own website. Later, projects will also be able to integrate our swap service, receiving fees and referral rewards from every transaction.

## UTYABSWAP Upcoming Features

### Wallet

The heart of our ecosystem, the UTYABSWAP wallet will be much more than just a place to keep your crypto safe. Think UTYABSWAP's entire suite of services in one convenient app. Powerful, simple, and easy, with everything you need to trade on TON. Coming to the iOS App Store, Android Play Store, and as a browser extension, your UTYABSWAP wallet will be the doorway to social crypto on Telegram.

### Burn

Here at UTYABSWAP we're big on community and economy, so we love token burns. For example our DEX beta release (Q3.24) will burn \$UTYAB wherever UTYABSWAP charges fees. Likewise we'll burn a percent of the penalty for early staking withdrawal. Then, since the total supply of \$UTYAB is already in circulation, we expect our burn mechanism to permanently remove at least 500,000,000 \$UTYAB (50% of supply) by mid 2025, driving \$UTYAB price.

### View

Projects often encounter problems with their listings on crypto terminals. So we've decided to provide an easy solution: our chart viewer for the TON eco. Integrated with the UTYABSWAP app to maximise your trading speed, this feature will combine our DEX functionality with all the standard terminal offerings. For example watch lists, annotations, indicators, contract analytics, and more. Plus with its advertising feature, our viewer app will bring revenue to the Utyab ecosystem.

### DAO

The DAO will enable \$UTYAB holders to vote regarding the UTYABSWAP ecosystem. For example, decisions concerning project development, treasury expenditure and the \$UTYAB burn mechanism. Simple to join, you'll only need to stake \$UTYAB and you'll be entitled to vote. And the more \$UTYAB you stake, the stronger your voice. We aim to develop a DAO with its best interest at heart, so honouring this ambition, you'll see we already hold community votes on our Telegram channel @utyablack

## NFTs

UTYABSWAP will feature a marketplace where users can create, buy, sell, and trade non-fungible tokens (NFTs) including but not limited to, digital artworks, collectibles, and in-game items on the TON Blockchain. Then to create an NFT item, the minting wallet will only need to hold \$100 worth of \$UTYAB or more. This gets even more interesting with our upcoming NFT staking feature. To see the current UTYABSWAP NFT collection available to purchase, you can take a look [here](#).

## Referral Rewards

UTYABSWAP marketing is organic. Added to this, our followers are organic too. Point being, we recognise our outstanding community is responsible for our amazing growth, particularly since UTYABSWAP is such a new project. So to show our appreciation, we will be providing generous referral links to reward engagement with new members. This means every time you recommend our swap or staking, you will earn as the Utyab ecosystem grows.

## Mint

Want to make your own crypto project? Our mint feature will have that covered. For example, you'll be able use the mint in our DEX to create your own token, add a liquidity pool, and then lock your liquidity to keep your community safe. Then when you're ready for the finishing touch, you can offer your holders staking through our staking service. Plus, how about providing your holders with a referral link to earn on every transaction? All possible with UTYABSWAP. More meme coins ahoy!

## Limit Orders

UTYABSWAP is made for the people on TON with features for everyone, beginner to advanced. So our limit orders will be simple, allowing you to preset the price to buy or sell. Then you can take profits or stop losses, automatically. Also limit orders can help you get closer to the price you want when the market moves quickly. Another good thing, limit orders can be left open until executed. Helping you to sleep soundly and ensuring you don't miss out.

## DCA

To avoid significant price impact, our DCA feature will enable you to buy or sell your positions gradually. For example, say you have \$1000 to spend and you want to buy a coin in small amounts at regular intervals. So in this case, you could set UTYABSWAP to DCA buy \$100 every hour for 10 hours. Or you could sell your position in the same way. Our very own whale magnet, which will benefit all \$UTYAB holders, with fees returning to the UTYABSWAP eco.

## About UTYABLABS

Picture three crypto enthusiasts in the space since 2017. Now imagine all that time they've been waiting for the right moment to launch a crypto project of their own. Enter TON! Recognising the massive potential of this innovative blockchain, in 2023 the three friends decided it was time to start with their vision: to make crypto easier and more accessible for all. Behold UTYABSWAP! One of the most rapidly developing projects on TON.

### Our goal

Our goal is to provide people with great products. And that's about it. So here at UTYABLABS we're obsessed with innovation, focused upon easy solutions for the user. So to show everyone we mean it, we created our flagship project UTYABSWAP accompanied by its native coin \$UTYAB. Then progressing from strength to strength, the ultimate purpose of our project is mass adoption through our apps, to bring TON to the world and make crypto simpler for everyone.

### Why TON Blockchain and Telegram?

Telegram is the crypto social network that grows everyday. Likewise TON Blockchain has the largest uptake of new users. So naturally, we want our products to be at the forefront of crypto adoption and development. Plus we love quick and easy. This means if you're comfortable using Telegram, then you'll be fine operating our products, which is something we cherish about this chain. Fast and effective in your pocket.

### Our vision

We believe the potential of blockchain technology can change the world for the better. So beyond building outstanding utility and quality, to encourage widespread adoption, our vision is make crypto simple for the people...and that's exactly what we're here to do. Then whatever the function, we'd like to see crypto as simple as sending a message in a secure app, with utility that's enjoyable to use.

### Our specialisation

Our team has some of the best devs on TON, with creatives, entrepreneurs and a PhD in the mix. Plus we've got years of experience in crypto, deep resources, and leading advisors supporting us. Which all means we can bring you the best product...yesterday. Think fast and then faster than that. In short, we know the crypto world moves quick, and we know success moves quicker. And that's our speciality: innovation delivered fast and simple.

## \$UTYAB Tokenomics

|                     |   |
|---------------------|---|
| Name                | UTYABSWAP   |
| Symbol              | \$UTYAB   |
| Total supply        | 1,000,000,000   |
| Circulating supply  | 989,627,953   |
| Total burnt to date | 10,372,047  |
| Burn mechanism      | where fees and penalties are charged, \$UTYAB is burnt  |
| Economy             | Deflationary  |
| Token distribution  | Fair launch   |
| Contract address    | EQAw63ZqLmnwRA77PW07CWIEngwg-eliysaqZ8IWpUL0nP7a  |
| Contract explorer   | <a href="https://tonviewer.com/EQAw63ZqLmnwRA77PW07CWIEngwg-eliysaqZ8IWpUL0nP7a">https://tonviewer.com/EQAw63ZqLmnwRA77PW07CWIEngwg-eliysaqZ8IWpUL0nP7a</a> |

### Best practice

Here at UTYABSWAP the well-being of our community comes first. Which means as part of this commitment, \$UTYAB incorporates features to keep our holders safe. For example, \$UTYAB contract ownership is revoked. The liquidity is burnt and locked. There's no buy or sell tax. No white list, no black list. No vesting, with 100% of the total supply in circulation. Plus our burn mechanism which ensures you benefit from \$UTYAB's deflationary tokenomics.

### Our company details

**Dokument o registraciji**

Izmjene: Naziv, Skraćeni naziv i Statut

Registarski broj: 5-1184262 / 002  
PIB: 03606589

Datum registracije: 17.10.2023.  
Datum promjene podataka: 24.06.2024.

**DRUŠTVO SA OGRANIČENOM ODGOVORNOŠĆU "UTYABLABS"**

Broj važeće registracije: /002

### The UTYABLABS Team

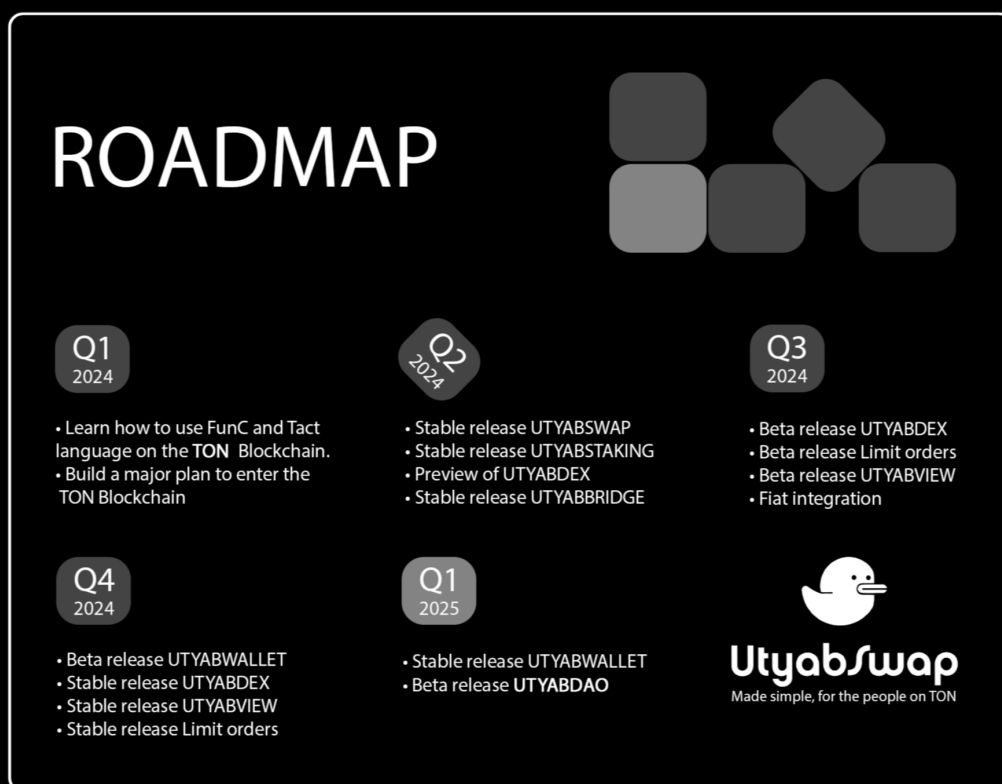

With five in the core team, including three founders, and fourteen team members in total, the UTYABLABS family delivers excellent quality, fast. Added to which, we minimise operating costs to maximise resource allocation to product development. In practice, this means we prioritise self-sufficiency and pursue our own solutions first. We're often asked how UTYABLABS delivers so much, so quickly, and to such a strict roadmap. This is how!

Adrian, UTYABLABS Founder

## Marketing strategy

We're here for the duration and our marketing strategy reflects this. So rather than pay-for-play engagement, we let the quality of our products speak for us. For example, seeing our potential and recognising that we deliver, we've partnered with a significant crypto project in Asia. Where we'll supply them the full suite of UTYABSWAP utilities once we reach stable release. So in short, while we work with KOLs and affiliates throughout the crypto-space to promote our brand, our overall approach is to deliver real value to the TON eco, and then push the network effect that follows.
